SUSIE RAKER
VICE PRESIDENT

Dear Valued Customer –

Wow! What a season. 2020 and 2021 threw our industry curve balls because of the pandemic, and the tremendous growth that resulted because of it. Our industry desperately needed that boost. 2022 has been the year of supply chain issues and surcharges.

The unprecedented growth in gardening created by the pandemic, coupled with the affects the pandemic has had on supply chain, has made producing and selling plants more difficult. At Raker-Roberta's, it felt like we were dodging bullets all season. Is that shipment of trays going to be here on time? Where is that load of media? The surcharge on that freight bill is what? We need how many more employees?

Through 2020 and 2021, our industry learned our products are relevant and important to people's peace of mind and well-being. 2022 has taught us to be nimble on our feet and diligent about costs to protect the bottom lines of our businesses. I wonder what lessons we will learn in 2023?

Raker-Roberta's Young Plants is already deep into planning for 2023 and 2024. We are purchasing hard goods as far into the future as we are able. We are evaluating trends, investing in technology and automation, and overall looking to the future. Greenhouse improvements include upgrading lights in the propagation range, purchasing new seeding equipment, and installing a new automated system to help package our direct-to-consumer products. Necessity breeds innovation.

We value the trust you have put in our company and our products. We truly appreciate your business, our relationships with all of you, and look forward to serving you for many years to come.

Respectfully –

Susie Raker-Zimmerman
Vice-President Raker-Roberta's Young Plants
